Legacy System

- **Automated Recruit Management System (ARMS)**

Exceeded Life expectancy

Limited Edits

System Changes

Maintenance Cost

MARINE CORPS

SELMS OVERVIEW

- **SELMS is a multi-user, web enabled system that supports the collection, maintenance and reporting of data required to effectively manage the activities of a new Marine through the Entry Level School.**

SELMS OVERVIEW (CONT)

- **System Program Sponsors: MARCORSYSCOM**
- **Functional Sponsors:**

  MI Division
- **Design, Programming and Testing Conducted by Oracle and MI in standalone environment**

MARINE CORPS

Project Expectations

- SELMS is intended to replace three of the four subsystems/modules of ARMS:
  - Depot
  - Marine Combat Training (MCT)
  - Entry Level Schools (ELS)
  - ARMS(RS), the forth module of ARMS is being replaced by MCRISS

Project Scope

- **SELMS will provide new functionality to present users of ARMS. This additional functionality will include:**
  - **Record of Emergency Data Updates**
  - **Situational Reporting for Individual Discharge Information**
  - **Statement of Service Report**
  - **Team Integrity Reporting**
  - **Online Help Screens**
  - **Support for 3d party tools (i.e. Impromptu)**
  - **Print Promotion Warrants OnLine**

DEPOT Processing

- Receiving Barracks
- Volume Updates
- Promotions
- Orders
- Individual Processing
- Dependents

MARINE CORPS

Receiving Barracks

The purpose of the Receiving Barracks

functionality is to support the following

functions:

- **Create a platoon to which recruits will be assigned**
- **Print a Roster of recruits expected on or after the ship date**
- **Record a recruit's arrival at the DEPOT**

Volume Updates

- The Volume Update functions allows users to access ten categories of updates that can be made to a specific platoon
- The purpose of the Volume Update function is to facilitate the entry of a large quantity of scores for recruits rather than entering each score individually by social security number
